

3. (Twice Amended) The laminate according to Claim 11, wherein each interlayer independently is a layer consisting of at least one member selected from the group consisting of an oxide, a nitride, an oxynitride, a carbide and a boride.

4. (Twice Amended) The laminate according to Claim 1, wherein the thickness of each interlayer independently is from 0.1 to 30 nm.

5. (Twice Amended) The laminate according to Claim 1, wherein each metal layer independently is a layer containing at least one metal selected from the group consisting of silver, copper and gold.

6. (Twice Amended) The laminate according to Claim 11, wherein the sheet resistance value is from 0.5 to 3.5 Ω/\square , the visible light transmittance is at least 40%, and the visible light reflectance is at most 10%.

7. (Twice Amended) The laminate according to Claim 1X, wherein a resin film having a low-reflecting property is further laminated thereon.

• 8. (Twice Amended) The laminate according to Claim 1, wherein a resin film having a near-infrared shielding property is further laminated thereon.

9. (Twice Amended) The laminate according to Claim 11, wherein the visible light reflectance is at most 3%.

DISCUSSION OF THE AMENDMENT

Claims 1 and 10 have been cancelled. Each of Claims 2-9 have been amended to depend on Claim 11. In addition, the term “the interlayer” has been changed to --each interlayer independently-- in Claims 3 and 4, and the term “the metal layer” has been changed to --each metal layer independently-- in Claim 5. See the discussion of the
